

MECH151: Technical Design – Prototyping

SolidWorks Practice Problems – Attendance Credit Tracking Sheet

Work through all 9 levels of the SolidWorks Practice Problems on the course site: complete 3 problems of your choice from each of Levels 1–8 (24 total), plus the Level 9 final project — a single actuating vice assembly. Record the problem numbers you completed below (e.g. “12” for Practice Problem 4.12).

Submit: email your completed model files to kainanis@hawaii.edu — as a direct attachment, or through UH FileDrop (hawaii.edu/filedrop) addressed to the same email — and include this sheet. Your instructor will sign off below after reviewing.

Name:		Date:	
--------------	--	--------------	--

Level	Prob. 1	Prob. 2	Prob. 3	Instructor sign-off
Level 1 — Basic Sketch and Extrusion				
Level 2 — Sketch Tools & End Conditions				
Level 3 — Global Variables & Sketch Patterns				
Level 4 — Extrude Cut & Fillet/Chamfer				
Level 5 — Reference Geometry				
Level 6 — Revolve Boss/Cut				
Level 7 — Feature Patterning				
Level 8 — Sweep Boss/Cut				
Level 9 — Final Project: Actuating Vice	Submitted ☐
