

MECH 151: Technical Design – Prototyping

Self Reflection

Final Exam — Prototype Project (individual submission)

This is an individual submission — each team member completes and submits their own copy.

Your Name: _____

Team Name / Number: _____

Date: _____

Prompts to Address

- **Your Contribution** — describe your individual role and contributions to the prototype project. Be specific about what you personally designed, built, documented, or figured out.
- **What Went Well** — what part of the process (design, teamwork, manufacturing, documentation) went well for you?
- **Challenges & What You'd Do Differently** — what was harder than expected? Looking back, what would you change about your design, process, or teamwork?

Keep your self reflection to 2 pages or less.

The contributions you claim here should match what's listed for you in your team's Work Breakdown Summary.
